

MEMBER WORKSHOP: ALIGNING ORGANISATIONAL PURPOSE, PRACTICE & PEOPLE

October 19th 2017 | 9.30-3.30pm | Sports House Milton

Organisational effectiveness and results only come from successfully aligning people and practice with organisational purpose or mission. While this is obvious it remains one of the great contemporary management challenges.

Experience tells us that to successfully align, an organisation requires an engaging purpose that all staff and stakeholders can rally around. This sets the frame to focus energy and effort on the 'right' strategic foci; and to engage the right people (e.g. appropriate attitude, abilities and approach) to come together doing the 'right' work.

This Alignment workshop will challenge and support SSO's to:

- engage their people through purpose;
- focus and align the energy, efforts, and capacity of their people;
- consider the role of systems, process and capacity building;
- establish practices, reinforced by principles to create an effective performance culture.
